

Professional 5000 SERIES

Vinyl Windows Replacement and New Construction

Beautiful, Economical and Versatile

Professional 5000 Series windows are designed for beauty and built to last. State-of-the-art technology is used to create clean window lines that enhance a home's appearance without breaking the budget. The five frame styles available on the Professional 5000 Series make these windows easy to install into any replacement or new construction project.

Professional 5000 Series windows are built with high-quality materials and up-to-date manufacturing techniques, and will provide years of comfort for you and your family.

Glass Options

Low-E insulated glass packages are a great option to help reduce heating and cooling costs. In warm weather, Low-E glass reduces solar heat gain, minimizes interior glare, and lowers inside glass temperature to help save energy. In cool weather, Low-E glass provides outstanding thermal performance with warmer inside glass surfaces to keep homes more comfortable.

Low-E prevents heat from exiting the home during cooler weather.

Low-E reduces solar heat gain by diffusing radiation coming from the sun.

Standard Glass Package

Additional Glass Options

*Argon gas enhancement available with all glass packages

*Intercept spacer may be upgraded to Intercept Ultra™ spacer or Super Spacer® on all glass packages

Grids

Flat or sculptured grids between-the-glass (GBG) and Simulated Divided Lite (SDL) grids are available in standard and custom patterns.
